

Nullifire SC902 'Fast Track' Intumescent Coating

120
FRL

Structural Steel Fire Protection Advanced Intumescent Technology

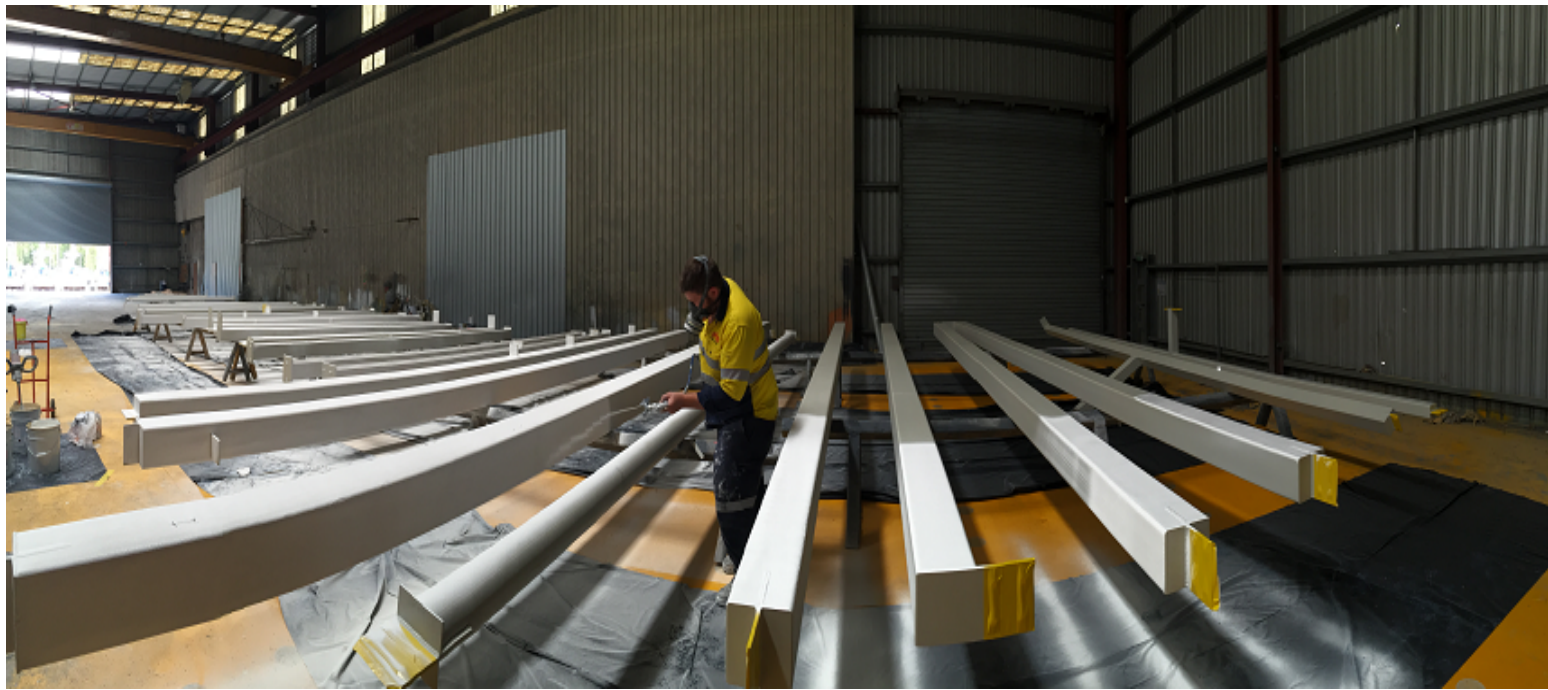

Nullifire SC902 is the world's only 'Hybrid' intumescent coating system that delivers unrivalled performance compared to all other cellulosic intumescent coatings. Following are some of the unique benefits of this system:-

- + 60% faster application and curing times compared to other intumescents
- + Suitable for both off-site or on-site application - internal or external steel - low VOC
- + High build, single application 'Fast Track' process delivers high productivity gains allowing for faster delivery of floors to following trades
- + Rapid curing - early weather resistance within 1 hour of application - ideal for open construction sites - saves on labour costs and time delays
- + Very surface tolerant - can be applied directly to flash rusted steel - cures in low temperatures - down to zero C and high humidity - 85%+RH
- + Small application equipment footprint - standard airless spray application
- + Not a 'wet trade' - faster, cleaner, durable and easy to repair
- + Full certification to Australian Standards
- + Extensive use on Australian projects in all States
